

No. of Functional Features Included in the Solution

Date	15 March 2026
Team ID	SWTID-2026-8305
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	5 Marks

Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	UI Policy on Incident	Makes Incident fields mandatory, visible or read-only based on conditions.	UI Policy	Done	0.5
2	UI Policy Action: Urgency	Controls the Urgency field behaviour when the policy condition is met.	UI Policy Action	Done	0.5
3	onChange Client Script	Runs when a field value changes and updates related fields or shows a message.	Client Script (onChange)	Done	0.75
4	onSubmit Client Script	Validates data on save and blocks invalid or incomplete incidents.	Client Script (onSubmit)	Done	0.75
5	onCellEdit Client Script	Prevents State from being changed through list editing and alerts the user.	Client Script (onCellEdit)	Done	0.75
6	Dynamic Form Behaviour	Form fields update instantly based on user actions, without submitting the form.	UI Policy + Client Script	Done	0.5
7	User-Friendly Messages	Clear alerts / error messages guide the user when an action is not allowed.	Client Scripts	Done	0.5
8	Testing & Verification	All policies and scripts tested on the Incident form and list view.	Incident form / list	Done	0.75

Feature Summary:

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	8
Core / Must-Have Features	5 (UI Policy, UI Policy Action, onChange, onSubmit, onCellEdit)
Additional / Nice-to-Have Features	3 (Dynamic Form Behaviour, User-Friendly Messages, Testing & Verification)
Features Tested & Verified	8

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	4	UI Policy, UI Policy Action, Dynamic Form Behaviour, User-Friendly Messages
2	Backend / Logic	4	onChange, onSubmit, onCellEdit Client Scripts, Testing & Verification
3	Database / Storage	0	Uses the existing Incident table; no custom table created
4	API / Integration	0	No external integration (uses the built-in GlideForm client API only)
5	Security / Authentication	0	Admin / developer role used for configuration; no custom authentication
